## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
  2. The text of those sections of Title 35, U.S. 102 (b), (e) Code not included in this action can be found in a prior Office action, dated 3/13/06. Newly added claim 10 correspond with the limitations of claims 2 originally filed, and should be included in the rejection of paragraph 4, 5, or 7.

### ***Response to Arguments***

3. Applicant's arguments filed 6/12/06 have been fully considered but they are not persuasive. Applicant argues first that the cited references do not disclose the membrane with the polymer having "double carbon bond". Reference to Ho (US 5,062,866) teaches that kind of polymer (see column 5, lines 35-40), e.g. acrylamide, etc. Perry teaches the double bond including polymers for the membrane including polymers claimed in claim 6 e.g. polystyrene, etc (see column 4, lines 33-51); and Kang et al (US 6,645,276) teaches double bond including polymers, e.g. polyacrylonitrile, polyacrylamide (see column 6, table 3). Applicant further argues that the membranes in these patents can not be operated under 'dry operation conditions', however, the membrane and not the process of using the membrane is claimed in claims 1-10.

In response to applicant's argument that the membranes in the prior art cannot be operated under dry operation conditions, which limitation is added to claim 1 by the later amendment, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

In the present case the added limitation does not result in a structural difference between this invention and the prior art and therefore, the membranes of the prior discussed in the prior office action inherently can perform the same function.

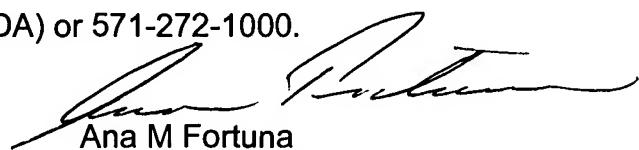

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
